

2-days course for foreign workers 4/4 and 11/4 2019

INVITATION TO 2-DAYS COURSE

Are you a foreign worker or do you have a foreign employee, who wants to know more about dairy farming? VKST is now holding a course to give you as employee, a better understanding of the theoretical background for the practical work.

We will take a closer look at how to handle cattle correct and safely in our work, both for the sake of the cattle and workers, the cow's signals and Danish culture. Furthermore, we will talk about milking and lactation, feeding and the transitional period from drying off till after calving.

The purpose with the course, is to give you as an employee, some qualifications to know why problems occur and how to solve them. And a better understanding of important issues of milk production in Denmark.

The first day of the **course is held the 4. April**, and **the second day at the 11. April**.

Program of day 1: (4. April)
